Skills

Game Engine: Unreal Engine.
Programming: C++, Java.
Tools: Git, Visual Studio, JetBrains Rider
Software: Blender, Photoshop, Gimp, DaVinci Resolve.
Cloud: AWS (EC2, S3, RDS, VPC).

Education

BTech in Computer Science at Indira Gandhi University

2021 - 2025

Projects

Multiplayer Subsystem Plugin

Unreal Engine - C++

- It is a reusable Online Subsystem to streamline multiplayer session management.
- Plug-and-play module, reducing network setup time for new projects.
- Implemented core features including session creation, searching, joining, and seamless travel.

CoinQuest

Unreal Engine - Blueprints

- Developed a coin-collection mechanic that unlocks the next level once the target amount is reached.
- Created enemies that track, chase, and attack the player using NavMesh.
- Managed player health, death states, and level transitions entirely through Blueprint Visual Scripting.

3D Parkour Prototype

Unreal Engine - C++

- Programmed a variety of moving platforms with distinct movement patterns, including rotation and physics mechanics.
